

Investing in our Downtown

100 Street Corridor Construction Bulletin

Beneath 100 Street, the 80-year-old water, sanitary, and storm sewer pipes need replacement. On the surface, the entire roadway and sidewalks will be reconstructed to reflect a high-quality urban design to match the vision created during the 100 Street Corridor Plan Design Charrette that took place in 2019.

You will see features such as:

- Wider sidewalks to accommodate pedestrians and winter snow management
- Boulevard trees with an automated irrigation system
- New benches and furnishings
- Decorative lighting which improves visibility, but also helps create a safer street
- Left-hand turn lanes to make vehicle movements easier
- Dedicated space for roadway snow storage

SIDEWALK CONCRETE INSTALLATION

101 AVENUE INTERSECTION UNDERGROUND UTILITIES

Week of July 18, 2022 Update

Since the previous update on July 4, 2022, the following activities have occurred:

- Silva-cell excavation and installation
- Electrical duct installation
- Underground utilities installation at 101 Avenue
- Centre turn lane preparation and concrete pouring
- Curbing installation
- Sidewalk preparations and concrete pouring
- Irrigation installation activities

Work planned for the reporting next period

- Continued silva-cell excavation and installation
- Continued sidewalk installation and preparations
- Underground utilities installation at 101 Avenue
- Curbing installation at 99 Avenue
- Bus lane concrete preparations and pouring
- Electrical installations

Sidewalks (as of July 18)

	East	West
99 Ave to 100 Ave	✓	✗
100 Ave to 101 Ave	✓	✓

All businesses remain open and accessible.
