

Investing in our Downtown

100 Street Corridor Construction Bulletin

Beneath 100 Street, the 80-year-old water, sanitary, and storm sewer pipes need replacement. On the surface, the entire roadway and sidewalks will be reconstructed to reflect a high-quality urban design to match the vision created during the 100 Street Corridor Plan Design Charrette that took place in 2019.

You will see features such as:

- Wider sidewalks to accommodate pedestrians and winter snow management
- Boulevard trees with an automated irrigation system
- New benches and furnishings
- Decorative lighting which improves visibility, but also helps create a safer street
- Left-hand turn lanes to make vehicle movements easier
- Dedicated space for roadway snow storage

CONCRETE CENTRE LANE AND CURBING POURED

ROAD LINE MARKING COMPLETED

Week of July 29, 2021 Update

Since the previous update on July 15, 2021, the following activities have occurred:

- Installation of Silva Cells for street trees began on the west side
- Concrete curb and gutter and centre lane poured
- Sidewalk subgrade preparations
- Road line marking completed on existing roads
- Material removal from the west sidewalk
- Existing traffic signal modifications

Work planned for the reporting next period

- Continued electrical ducting and irrigation system installations
- Continued sidewalk subgrade preparations
- Silva Cell material placement
- East sidewalk preparation and concrete
- Landscaping on the east side of the project

Sidewalks (as of July 29)

	East	West
96 Ave to 97 Ave	X	X
97 Ave to 98 Ave	X	X
98 Ave to 99 Ave	X	✓

All businesses remain open and accessible.
